

A Children's Wonderland

Where Dental Health Lasts A Lifetime

Today's children can enjoy a lifetime of healthy teeth and gums in an educational and stimulating environment. When your child enters our office, they step into a "Children's Wonderland". Child-sized hangers await in the coatroom; toys, books, videos and lively animal murals adorn the waiting room walls, and our friendly staff is available to meet and greet you.

Our pediatric dental office strives to create a non-threatening experience where kids leave happy and enthusiastic about their next visit. On the child's first visit, the staff brings the parent and child into a room without any dental equipment. After a brief orientation they enter our circular exam room, which is truly a visual experience. Colorful stuffed fish hang from the ceiling and a unique cartoon-style underwater mural is painted on the walls. Each procedure room has its own particular appeal with wall decorations offering tips on good eating habits, Olympic pictures, and photos of famous sports personalities, which appeal to patients of all ages and even their parents. Visits end with a much deserved trip to our toy tower for a final goodbye token. On special occasions, our friendly office mascot, Dr. MicTooth, appears creating a huge impression on young guests.

Every step is explained to the child before the staff begins any cleaning. Our x-rays are fast and easy because the office uses the newest digital technology. Our young

patients love the flavored toothpaste and fluoride treatments. Just ask them!

When you call to set up an appointment, make it at your convenience. "Our office makes an extraordinary effort to schedule appointments in a timely manner." From nap times to school hours, your time conflicts matter and the office works very diligently to accommodate your needs. To make this process even easier, our web site, www.tots2teensdental.com, is a convenient place to browse for information, such as procedures done in the office, photographs of the office and staff, as well as another way to schedule appointments and fill out necessary information to make your first visit even easier.

Remember, an ounce of prevention is worth a pound of cure. The American Academy of Pediatric Dentistry and The American Academy of Pediatrics recommends that children start visiting the dentist by their first birthday to establish

good oral hygiene habits. In most cases this is a well-baby visit and provides the basis for enthusiastic return appointments.
